

ГИДРАВЛИЧЕСКИЕ СИСТЕМЫ

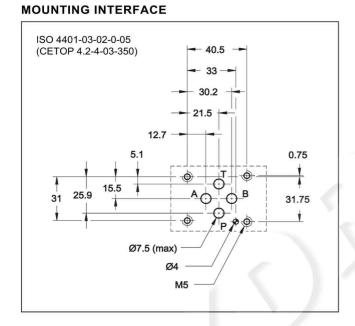

DSE3B

DIRECTIONAL VALVE WITH PROPORTIONAL CONTROL SERIES 10

SUBPLATE MOUNTING ISO 4401-03

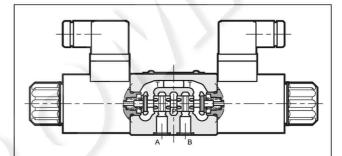

p max 350 bar Q max 40 l/min

OPERATING PRINCIPLE

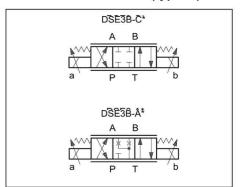

PERFORMANCES (obtained with mineral oil with viscosity of 36 cSt at 50°C and with electronic control unit)

Max operating pressure: P - A - B ports T port	bar	350 160	
Nominal flow with ∆p 10 bar P-T	l/min	8 - 16 - 26	
Step response		see chapter 5	
Hysteresis (with PWM 200 Hz)	% Q _{max}	< 6%	
Repeatability	% Q _{max}	< ± 2%	
Electrical characteristics		see chapter 4	
Ambient temperature range	°C	-20 / +50	
Fluid temperature range	°C	-20 / +80	
Fluid viscosity range	cSt	10 ÷ 400	
Fluid contamination degree	According to ISO 4406:1999 class 18/16/13		
Recommended viscosity	cSt	25	
Mass: single solenoid valve double solenoid valve	kg	1,6 2,0	

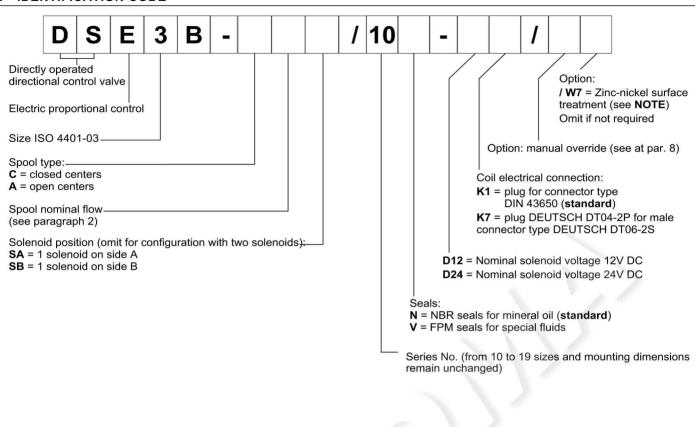

- The DSE3B valve is a directly operated directional control valve with electric proportional control and with ports, in compliance with ISO 4401-03 standards.
- It is used for directional and speed control of hydraulic actuators.
- Valve opening and hence flow rate can be modulated continuously in proportion to the current supplied to the solenoid.
- The valve can be controlled directly by a current control supply unit or combined with an external electronic card to exploit valve performance to the full (see par. 11).

HYDRAULIC SYMBOLS (typical)

1 - IDENTIFICATION CODE

NOTE: The standard valve is supplied with surface treatment of phosphating black.

The zinc-nickel finishing on the valve body makes the valve suitable to ensure a salt spray resistance up to 240 hours. (test operated according to EN ISO 9227 standards and test evaluation operated according to UNI EN ISO 10289 standards).

For a salt spray resistance up to 600 hours order the high corrosion resistance version.

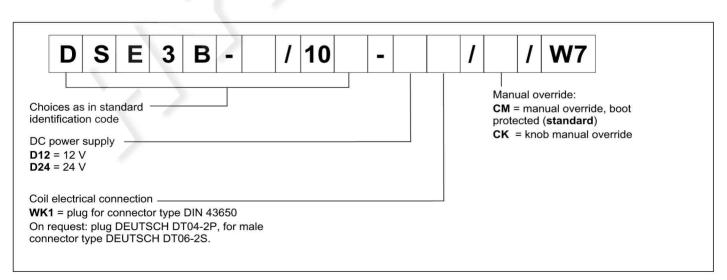

1.1 - High corrosion resistance version

This version features the zinc-nickel coating on all exposed metal parts of the valve, making it resistant to exposure to the salt spray for **600 hours** (test performed according to UNI EN ISO 9227 and assessment test performed according to UNI EN ISO 10289).

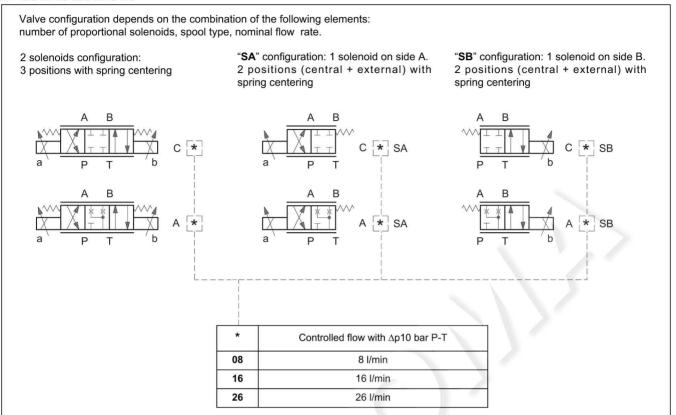

The coil are specific for this version, featuring a zinc-nickel surface treatment. Electrical features at paragraph 4.

The boot manual override (CM) is installed as standard in order to protect the solenoid tube.

Follow the indentification code below to order it:

2 - CONFIGURATIONS

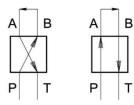

DSE3B SERIES 10

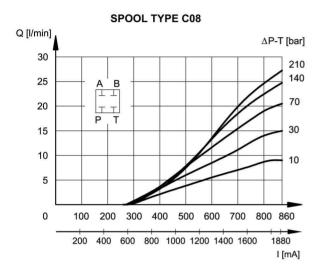

3 - CHARACTERISTIC CURVES

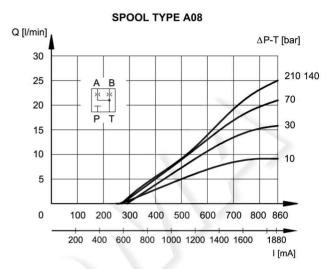

(values measured with viscosity of 36 cSt at 50°C with electronic control unit)

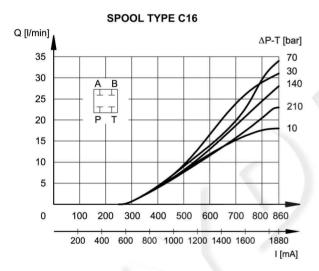

Typical constant flow rate control curves at Δp according to current supply to solenoid (D24 version, maximum current 860 mA), measured for the various spool types available.

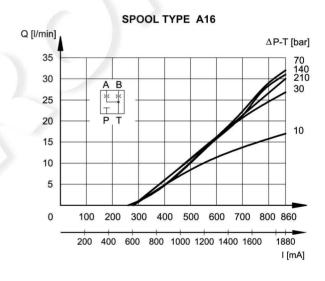

The reference Δp values are measured between ports P and T on the valve.

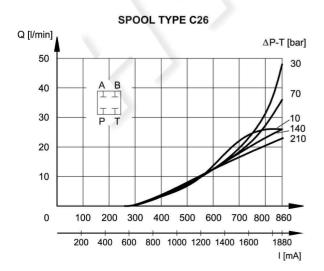

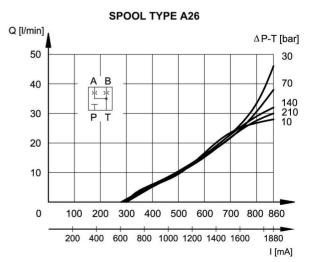

4 - ELECTRICAL CHARACTERISTICS

Proportional solenoid

The proportional solenoid comprises two parts: tube and coil.

The tube, screwed to the valve body, contains the armature which is designed to maintain friction to a minimum thereby reducing hysteresis.

The coil is mounted on the tube secured by means of a lock nut.

It can be rotated through 360° depending on installation clearances.

Protection from atmospheric agents CEI EN 60529

Plug-in type	IP 65	IP 69 K
K1 DIN 43650	x (*)	
K7 DEUTSCH DT04 male	х	x (*)

(*) The protection degree is guaranteed only with the connector correctly connected and installed.

NOMINAL VOLTAGE	V DC	12	24
RESISTANCE (at 20°C)	Ω	4,4	18,6
MAXIMUM CURRENT	А	1,88	0,86
DUTY CYCLE		100%	
ELECTROMAGNETIC COMPATIBILITY (EMC)		according to 2004/108/EC	
CLASS OF PROTECTION: coil insulation (VDE 0580) impregnation		class H class F	

5 - STEP RESPONSE

(measured with mineral oil with viscosity of 36 cSt at 50°C with electronic control units)

Step response is the time taken for the valve to reach 90% of the setted positioning value, following a step change of reference signal.

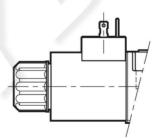

The table shows typical response times tested with spool type C16 and Δp = 30 bar P-T.

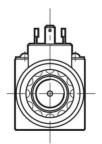

REFERENCE SIGNAL STEP	0 →100%	100 →0%
S	tep response [ms]	
DSE3B-A* DSE3B-C*	50	40

6 - ELECTRIC CONNECTIONS

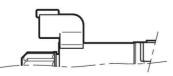

Connectors for K1 connection are always delivered toghether with the valves.

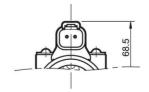

connection for DIN 43650 connector code **K1** (standard) code **WK1** (W7 version only)

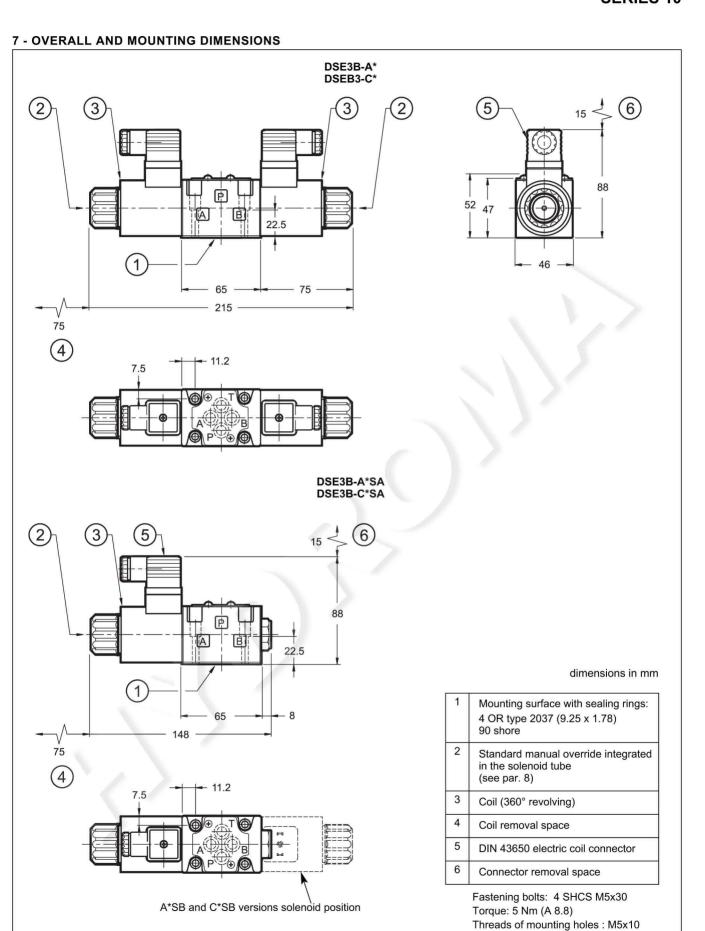

connection for DEUTSCH DT06-2S male connector code **K7**

DSE3B SERIES 10

6/8

Locking ring tightening torque:

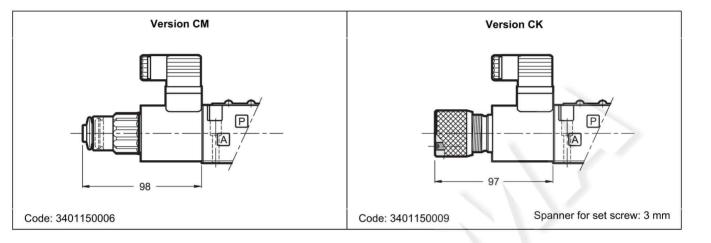

5 ± 0.5 Nm

8 - MANUAL OVERRIDE

The standard valve has solenoids whose pin for the manual operation is integrated in the tube. The operation of this control must be executed with a suitable tool, minding not to damage the sliding surface.

Two different manual override version are available upon request:

- CM version, manual override belt protected.
- **CK** version, knob. When the set screw is screwed and its point is aligned with the edge of the knob, tighten the knob till it touches the spool: in this position the override is not engaged and the valve is de-energized. After adjusting the override, tighten the set screw in order to avoid the knob loosing.

9 - HYDRAULIC FLUIDS

Use mineral oil-based hydraulic fluids like HL or HM type, according to ISO 6743-4. With this kind of fluids, use NBR seals type (code N). For HFDR fluids type (phosphate esters) use FPM seals (code V). For use with other kind of fluids such as HFA, HFB, HFC please consult our technical department.

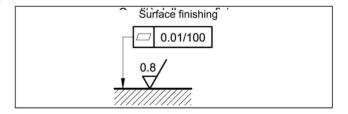

Operation with fluid temperature exceeding 80°C causes premature deterioration of the quality of the fluid and seals. The physical and chemical properties of the fluid must be maintained.

10 - INSTALLATION

DSE3B valves can be installed in any position without impairing correct operation.

Ensure that there is no air in the hydraulic circuit.

Valves are fixed by means of screws or tie rods on a flat surface with planarity and roughness equal to or better than those indicated in the relative symbols. If minimum values are not observed fluid can easily leak between the valve and support surface.

11 - ELECTRONIC CONTROL UNITS

DSE3B - * * SA (SB)

EDC-112	for solenoid 24V DC	plug version	see cat. 89 120
EDC-142	for solenoid 12V DC		
EDM-M112	for solenoid 24V DC	DIN EN 50022	see cat. 89 250
